

EVOCARDIO

Renegade Air Ski ASKI100

FULL BODY WORKOUT

The Renegade Air Ski ASKI100 strengthens the upper body, abdominal, back and leg muscles that are relevant to skiing. As the fitness machine works with an air and magnetic resistance system, the movements are very fluid. This makes training more fun and reduces the risk of injury.

The Air Ski ASKI100 with its 18 kg is a very sturdy training machine. This unit relies on a very strong, elastic rope system, requiring only 8 kg to move from bottom to top. The ASKI100 can be fixed to the wall with mounting brackets wherever you want.

Training with the Air Ski ASKI100 can be done kneeling or sitting in front of the machine. This makes the machine ideal for athletes with physical limitations. You control the training resistance yourself: pulling harder accelerates the flywheel and increases the resistance. The different resistance levels (1-14) make it possible to simulate practical training in all conditions. The "quick release" handle allows you to quickly switch between different training programs.

The ASKI100 has several training programs, allowing you to train in a varied and targeted way. The "Quick release" handlebar makes it easy to switch between different training programs. In addition, the large blue backlit LCD screen is easier to read during training. The Renegade Air Ski ASKI100 is self-generating so there is no need for electrical cables.

Quick Released Adjustable Locking Mechanism Design

TECHNICAL SPECIFICATIONS

Smooth, natural, unlimited airflow/magnetic resistance provided by heavy-duty 45 cm aluminum fan with cross-bonded steel blades.

Double robust 6203 sealed cartridge bearing set in the central hub of on the super steel fan for effortless rotation.

High performance internal drive mechanism with robust sealed cartridge unidirectional bearings to provide the best performance for both bipolar and conventional (alternating arm) technology. Minimal maintenance required.

Manual adjustable magnetic resistance system (14 levels) for high intensity training.

Low maintenance, endless Poly-V double ribbed belt transmission.

Lightweight, high-strength drive cords for a smooth workout and a long life span.

Self-levelling pulley system with robust sealed cartridge bearings and a width between 62 cm (max.) and 26 cm (min.).

The ergonomically designed handle offers horizontal and vertical placement options to train different muscles.

Stainless steel quick-release mechanism design for vertical & horizontal gripping positions for different exercises.

2 mm thick square tube frame for a stable construction.

4 mm thick steel mounting brackets, holder with fixing bolts & washers for various workouts

Built-in both ANT+ & Bluetooth wireless connectivity with mobile phone APP compliance (optional).

CONSOLE

Large back-lighted LCD Screen display 8 workout modes including 20/10, 20/30 custom intervals, 4 target settings and heart rate control.

9 features / readouts displayed time, stroke / min., Stroke, distance, calories, time/500m, watts, intensity setting & pulse for users's reference.

Built-In Polar wireless heart rate receiver to monitor your heart rate precisely.

console powered by AA LR6 / 1.5V battery (4 pcs)

DIMENSIONS

Product in use : D 38 x W 62 x H 80 cm

Carton: L 70 x W 58 x H 31 cm

Net/Gross weight: 23kg / 26.5 kg

maximum user weight: 150 kg
