

Schwinn Echelon2 console

The Schwinn Mpower Echelon console allows real-time performance and results measurement.

CHF 448.00

The Mpower Echelon console with RPM measures cadence, heart rate, calories burned (transmitter belt optional), stage and total workout time.

The functionality of the Schwinn Mpower Echelon console with RPM is further enhanced with the optional PowerUpgrade. This upgrade expands the power measurement capabilities: actual power in watts, as well as speed, distance, and calories burned (based on measured power) can be determined. Additionally, the exact resistance can be displayed.

Data and results can be saved via a USB stick and compared later. Interesting about the Power Upgrade, however, is the ANT+ function. This can be used, for example, to communicate with the Zwift software.

Console dimensions: 18 x 7.7 x 4.8cm

Display dimensions: 4.5 x 9.4cm

Display: large LCD display with backlight

Power: 2 C batteries

Compatible with : Schwinn AC Series

Display readouts: calories (kcal), distance / distance, heart rate, stage and total (time, distance and power), power (optional).

The Mpower Echelon console is compatible with all Schwinn A.C. series bikes.
