

## Life Fitness Platinum Club Series Discover SE3HD Ergometer

The Platinum Club Series Upright Lifecycle Bike SE offers the ultimate fitness experience and a whole new dimension of motivation. The Life Fitness Discover SE has a 47cm tablet console with integrated TV. State-of-the-art technology, intuitive, user-friendly design and tons of entertainment and training options - the Platinum Club Series Lifecycle SE is the revolution for home training.

**CHF 10'390.00**

Premium Discover consoles can be found in the best gyms and ensure that you always look forward to your workout at home. Enjoy the entertainment program, track your workout results and achieve your goals. Swipe technology allows you to navigate through your workout plans and entertainment program with just a few swipes of your finger.

The LFconnect app allows Apple and Android devices to interact with compatible Life Fitness devices. The app logs your workout history, gives you access to personalized training plans, provides motivation and encouragement, and serves as a display while you train on cardio equipment.

You are immediately recognized when you connect to a Discover, Explore or Track Connect console via the LFconnect app on an Apple or Android device.

The connection allows you to track your workout and access personalized workouts created at LFconnect.com. Factors such as speed (treadmills only) and incline/resistance selected when creating a workout plan are automatically adjusted during a customized workout.

GPS - You can track training runs, walks or bike rides that you do in nature with the GPS function on an Apple or Android device. Calories burned, time and distance are uploaded to LFconnect.com and the app's results page after the workout.

A smartphone can be used as a second display during the workout. This allows you to use the screen of the Life Fitness console exclusively for the entertainment program.

When you set the device's display to landscape mode, the LFconnect app switches to a display with three different areas showing duration, speed and either heart rate, distance, incline or level, distance covered and watts or calories.

**Features:**

- 47cm LCD screen in HD quality (HD display 1080p) and with touchscreen technology
- Integrated entertainment console - with Internet (wired and WLAN), Bluetooth, interactive tracks from Lifescape, TV and app compatibility
- Training computer with display of speed, incline, heart rate, pace, elapsed time, remaining time, time in target zone, time of day, distance, incline, distance climbed, remaining distance, calories, calories per hour, watts, heart rate and MET
