

Lojer Vertical Pull Apparatus Vertical Pull 50

The **Vertical Pull 50** is a vertical pull machine for wall mounting. The Lojer Vertical Pull 50 can be used as a lat pull, for negative weight or lifting exercises due to the integrated floor pulley. Individual adjustment of the rope height and length allows standing and seated exercises.

CHF 2'690.00

- Weight stack with protective covering
- consisting of 10 weight plates of 5 kg each
- allows weight increments from 5 to 50 kg maximum pull weight and thus an optimal relief of the musculoskeletal system during exercises with negative weight
- ratio 1:1
- especially quiet and smooth running due to ball bearing mounted rollers
- rotatable rope take-off prevents jamming of the rope
- height adjustable from 230 to 310 cm
- lat pull bar included
- wall mounting
- approved according to MPG
- dimensions (DxWxH): 76x51x230-310 cm
- color: grey
- wall mounting must be done on a stone or concrete wall - in most cases heavy duty anchors are the first choice for fixed mounting
