

Inkospor X-Treme L-Carnitine Concentrate 1L

L-carnitine is a vital natural nutrient that can also be produced by our body itself in small quantities. Among other things, L-carnitine plays an important role in the fat metabolism of our body, because L-carnitine can transport the long-chain fatty acids into the mitochondria, where they are burned.

CHF 22.50

Fat burning creates the energy needed for training, for example. L-carnitine also plays an essential role in the energy metabolism of the cells and is therefore important for the function of our body organs.

Conclusion: with regular training, additionally supplied L-Carnitine can support fat burning, reduce protein breakdown and promote regeneration.

1 serving Inkosporreg: X-TREME L-CARNITINE CONCENTRATE contains 1,000mg of pure L-Carnitine from the quality brand Carnipure of the company Lonza.
