

## Sponser Liquid Energy Plus 40 x 35g

Liquid Energy Plus is a highly concentrated energy gel and contains both fast and very slow available carbohydrate sources. Isomaltulose and betaglucan-containing barley fibers delay the sugar influx into the blood and make Liquid Energy Plus a novel carbohydrate gel.

CHF 80.00

Liquid Energy Plus is suitable as an additional energy supplement for long distances, where sweet supplements are often no longer used consistently towards the end for reasons of satiety. The salty yet neutral taste experience can also be taken generally in sports as a pleasant alternative to conventional gels. Liquid Energy Plus is a 100% natural energy concentrate without preservatives.

### Advantages

- high-tech energy gel with fast and slow metabolizable sugars especially for long distances
- neutral taste
- Easy handling thanks to practical portion bag

### Application

Ideal during long-term endurance training. Approx. 1 sachet per 20 minutes. Rinse with water.

### Ingredients

Glucose syrup, water, isomaltulose, barley starch hydrolisate, soluble barley fiber, table salt, tomato powder, potassium phosphate.

Packaging unit: 40 X 35g sachets

Flavor: neutral
