

## Finnlo power station Autark 2200 (3944)

The AUTARK 2200 power station by Finnlo is the extension of the Autark 1500 with a height-adjustable pull station. The AUTARK 2200 power station by FINNLO offers the ambitious strength athlete all possibilities. Butterfly, latissimus pull and rowing are possible with this power station as well as extensive leg, biceps and abdominal training. Triceps rope, latissimus bar and loops with cable pull included.

CHF 1'990.00

Butterflies, latissimus pull and rowing are possible with this power station, as well as crunches and numerous cable pull variations.

Unlike other power stations, the AUTARK 2200 Multi-Gym has a professional device for comprehensive leg muscle training including leg curls and leg bends. In addition, a triceps rope is integrated so that you can train even more effectively with the power station. The same applies to the butterfly lever arm, whose angle can be adjusted 5 times and thus allows variations.

The heart of the AUTARK 2200 strength station is an 80kg weight block, which is divided into 16 5kg discs and is easily adjustable. You take a seat on ergonomically shaped pads, whereby the backrest and seat height can be adjusted vertically and enable perfect training ergonomics. In addition, it features a sturdy tubular steel frame and ball-bearing rollers.

Optionally, the AUTARK 2200 strength station can be upgraded with an additional 20kg.

### **Equipment:**

- Latissimus pulling tower
- butterfly arms with 5-fold angle adjustment
- separate cable pulley at the bottom for varied arm and leg exercises
- pulley for abdominal exercise
