

NOHrD ball bearing pull handles in various wooden versions

The ball-bearing pull handle is mainly used for unilateral exercises. It offers a secure yet flexible grip and the rounded wooden handle fits comfortably in the hand. The ball bearings make it particularly easy on the joints and skin.

CHF 49.00

The ball-bearing mounted pull handle is available in different types of wood. It allows you to perform various exercises and is easy to use. Can be retrofitted to the SlimBeam at any time.

Extends the already extensive exercise options with new exercises and grip options.
