

Theraband Tubing Loop

The Theraband training tubes are made of natural latex and are available in four progressive resistances. Different resistance levels are achieved through different material thicknesses. These are identified by the Theraband colours, which are protected under the brand name. The color-coded system increases training motivation and provides positive feedback for both trainer and exerciser.

CHF 29.90

The Tubing Loops offer strengthening exercises in the familiar Theraband color coding and especially for the area around the thighs possibilities for toning. At the same time they serve the sport-specific training.
