

## Calyana by Airex - Professional Yoga Mat Stone Gray - L185 x W66 x D0.68cm

The Calyana - a premium yoga mat from the AIREX® Yoga & Pilates line - was developed in collaboration with highly qualified and prominent yoga teachers. The Calyana offers maximum safety, fun and durability so you can enjoy your time and balance body, mind and soul. With this superior quality, Calyana yoga mats are among the best yoga mats in the world, making them a wonderful yoga tool for all yoga practitioners. For all fitness enthusiasts, yogis and non-yogis, the Yoga Calyana Pro is the perfect mat for functional training of any kind. The Yoga Calyana Pro perfectly withstands the stress of jumping and pulling. This makes training really fun!

**CHF 89.90**

Feel the happiness and enjoy a time out from everyday life. With a Calyana yoga mat, this succeeds like never before.

The Sanskrit word kalyana means, among other things, beauty, happiness and well-being. The Calyana line by Airex was inspired by this.

Six convincing points for endless yoga pleasure :

- permanent optimal grip thanks to structured surface and 100% non-slip thanks to circular underside structure
- perfect cushioning for comfortable and joint-friendly training
- light and dimensionally stable
- durable material for long-lasting yoga pleasure
- washable and easy to clean
- Oeko-Tex Standard 100 certified, made of sustainable materials with environmentally friendly technologies
- recommended price 99.90

Dimensions: ca. 66 x 185 x 0,68cm, 1,4kg

Color: stone grey

Weight: ca. 2,35kg

**Medical purpose:**

AIREX® products are designed as a movement therapy aid for both institutional and home use. The object lying on the floor serves as a support for a person during medically indicated and prescribed exercises to improve motor skills and balance or postural control and/or for movement therapy treatment of muscle weakness in the limbs and trunk as a result of a neurological or orthopedic disease.

Why are the sizes given only in "approximate"? All AIREX mats are foamed freely. This means they are not produced in molds. The production process is comparable to baking a loaf of bread. The result can therefore be influenced depending on the environmental conditions (temperature, air pressure, etc.), so that the products always vary slightly in length, width and thickness.
