

TuffStuff Half Cage with Smith Machine Complete Set (CSM-725WS)

TuffStuff's exclusive Half Cage with Ball Bearing Multi Press CSM-725WS offers not only guided and free barbell training, but also a dual cable pull system for varied fitness and strength training in addition to a fixed lat pull/row station.

CHF 6'890.00

TuffStuff's Evolution series includes a Smith Machine / Half Cage Ensemble (CSM-725WS). The Smith Machine attachment features a 7° incline to allow for a natural range of motion. With enclosed self-aligning linear bearings, the pressing system combines with a half free weight rack and safe safety stops to safely perform a variety of free weight exercises.

The Smith Machine / Half Cage Ensemble comes standard with a built-in pull-up bar, Olympic bar storage, weight plate storage and the TuffStuff Multi-Purpose Bench (CMB-375). The Smith press bar (starting weight of 12.6kg) stores easily to allow full access to workouts at the cable station. With fully adjustable high/low cable pulley columns, a dual cable lat station and a fixed low rowing station, the CSM725WS allows for an almost unlimited number of functional and free weight training exercises.

Features:

- Free weight rest with 18 rest positions (height adjustable).
- 7° inclination for a natural motion sequence
- ball-bearing mounted multi-press with guided 50mm bar and compensating self-balancing bearing system, as well as safety stopper
- width between the weight plates: 170cm
- maximum weight load approx. 280kg
