

Schiek Deluxe pull strap pink 1000PLS

The Schiek Sports Model 1000PLS has a soft neoprene wrist guard with an approx. 30 cm long nylon/acrylic traction aid to minimize wrist strain when lifting heavy weights.

CHF 55.90

The material was processed perpendicular to the wrist and is therefore extremely durable. They do not stretch as quickly as pulling aids with not so good quality. The approx. 30 cm long pulling aids provide a secure hold around the weight bar. The practical thing about these traction aids is that they have a Velcro closure at the end of the traction aid, which you simply wrap around the wrist and fasten. So you can do exercises without the straps and support your wrists.

Made in the USA.
