

NOHrD Combi and swim trainer for wall bars

The combi and swim trainer - the perfect addition to the NOHrD wall bars. It can be hung at different heights on the rungs or used upright for leg training. With the CombiTrainer, around 35 selected additional exercises are available.

CHF 799.00

Secure hold

The rollable seat and lying surface is covered with a special adhesive surface to ensure a secure hold during training.

Secure footing

The CombiTrainer stands securely on the floor thanks to the foldable base. As soon as the CombiTrainer is hooked higher into the wall bars, the angle of the base changes.

High quality

The CombiTrainer is made of solid wood. The training ropes are easy to grip and you can easily hang the CombiTrainer on the **wall bars** after training.

Quiet and effective

The rollers of the seat and lying surface glide quietly over the guide rail and provide good support. You train exclusively with your own body weight.

Exercise with your own body weight - sitting, lying and standing: With the CombiTrainer for the WallBars, you can train all muscle groups effectively and specifically, turning the wall bars into a multifunctional training station.

The CombiTrainer's pulleys always run silently and smoothly over the ball-bearing rollers. The rollable lying surface is covered with a special adhesive surface to ensure a good grip in all positions during training. You train exclusively with your own weight.

The base of the CombiTrainer can be folded away after training, allowing the trainer to be hung on the wall bars to save space.
