

Sponser Competition Hypotonic 800g refill bag

pH-neutral sports drink with important electrolytes and a subtle aroma.

CHF 19.00

COMPETITION is a subtly flavored sports drink powder with important electrolytes. Thanks to its special composition and its neutral taste and pH properties, it is extremely well tolerated even at high concentrations. COMPETITION concentrates on the essentials of a sports drink - optimum fluid replacement with maximum energy density! This is made possible by the exceptionally low osmolarity combined with a significantly higher carbohydrate content than in conventional sports drinks. The 8 different carbohydrates enable the body to absorb them via different transport systems. This allows the body to obtain a significantly higher proportion of energy from the carbohydrates supplied and conserve the body's own glycogen reserves. The combination of different types of sugar also helps to ensure a slower and longer-lasting energy supply and improves energy utilization by 20-50% compared to a single type of sugar.

Advantages

- Practically pH-neutral competition drink, as it contains no acidifiers and is subtly flavored
- High molecular weight starch hydrolizates with very low osmolarity
- Isomaltulose (glucose + fructose) and trehalose (glucose + glucose) ensure a significantly slower rise in blood sugar and insulin levels compared to other types of sugar
- Up to 100 g powder per 1000 ml and still hypotonic (240 mOsm) Application Sports drink for the highest energy requirements and tolerance demands. Also suitable for carboloading. The drink is hypotonic (240 mOsm) up to 100 g/liter,
- for very high energy requirements, the concentration can be increased to max. 120 g/liter (isotonic).

Flavors: Orange, raspberry, citrus, fruit mix, cool mint

Packaging unit: 800g refill bag
