

## Weider L-Carnitine Liquid 20 ampoules

L-Carnitine drinking ampoules are easy to use and contain the nutrient L-Carnitine. The convenient L-Carnitine Liquid drinking ampoules provide L-carnitine and choline. L-Carnitine is a natural compound that is formed in the body from the two amino acids L-Lysine and L-Methionine and is also found in various animal and plant foods. In the human body, L-carnitine serves to transport fatty acids to the power plants of the cell (mitochondria), where they are "burned" for energy. The delicious L-Carnitine Liquid drinking ampoules from Weider contain only high-quality Carnipure®.
