

## Monitor to NOHrD SlimBeam

The new SlimBeam Monitor, including workout software, offers new full-body workouts every day with Workout-of-the-Day and a variety of pre-programmed workouts with detailed exercise videos. The SlimBeam Monitor attaches to the side of the SlimBeam and connects to the main board via USB. It has a 7 inch (approx. 17.8cm) display and is operated by touch screen. The electronics inside the SlimBeam transmit the recorded training data to the monitor and display it clearly. A WLAN connection ensures daily alternating workouts (workout of the day) and updates.

**CHF 399.00**

- Power connection necessary
- operation via touch screen
- the recorded training data are transmitted to the monitor and clearly displayed
- the selected weight and the set gear ratio are taken into account
- a WLAN connection ensures daily alternating workouts with the Workout of the Day where all exercises are displayed as video
- Bluetooth compatible
- connectivity: USB
- heart rate chest straps can be connected via ANT+
- dimensions: 11,4 x 19,6 x 4,8cm
- weight 3kg
- compatible with NOHrD SlimBeam\*

**\*Note:** Please check if your NOHrD SlimBeam is already prepared for the electronic training guidance system. You can tell by the hole on the right side and the already pre-installed circuit board inside the SlimBeam. If this is not the case, the body must be replaced.
