

Tanita DC 430 S MA Segment Body Analytical Scale

With the help of the Bioelectrical Impedance Analysis (BIA), total body water, body fat and fat-free mass can be determined. In addition, the body fat analysis scale Tanita BC-430 S MA, calibrated with stand, incl. printer and software, gives an indicator for visceral fat, bone mass, muscle mass and metabolic age.

CHF 3'890.00

The advantage of this analysis technique is its simple operation and non-invasive measurement. This allows a fast and precise analysis within 1 minute, without time expenditure for the doctor and patient.

As the latest addition to the professional TANITA product range, the DC-430 S MA prints not only weight, BMI, fat %, fat mass and total body water, but also metabolic age, estimated bone mass and visceral fat level.

Special Features:

- Instant printout of results
- With target range function
- Standard and athlete mode
- Calibrated according to calibration class III
- Single point load cell
- RS232 data interface
- With integrated thermal printer
- Wall mountable display

Total body measurements:

- Weight
- BMI
- Body fat %
- Fat Mass
- Fat Free Mass

- Muscle Mass
- Total body water kg
- Total body water %
- Basal metabolic rate
- Target ranges
- Bone Mineral Mass

Additional functions

- Display Visceral Fat
- Metabolic age
- Healthy bone mass indicator

Printout of the following parameters of the DC-430 S MA in only 20 seconds:

- Body Mass Index
- Weight
- Basal Metabolic Rate
- Fat % and fat mass
- Level for Visceral Fat
- Total Body Water
- Estimated bone mass
- Simple, non-invasive technology
- Calibrated according to calibration class III

Age range: 5-99 years

Graduation: 0.1kg

Measuring method: Bioelectrical impedance analysis

User-friendly backlighting

Display: Segmental

Max. weighing capacity: 270kg Interfaces: 1.5kg Weighing capacity: 270kg

Interfaces: RS232C or USB

Power supply: 7V AC adapter

Integrated thermal printer: yes

Product weight: 12.1kg

Platform dimensions: 1022 x 372 x 668mm

System height: 1022mm

Calibration class: III

MDD Class II-a and NAWI Class III

Measuring mode: Standard/Athlet

Colour: Blue/White

Warranty: 3 years
