

## Tanita DC 360 S body fat scale

Using clinically accurate Tanita Dual Frequency BIA technology, a complete body analysis can be performed in 15 seconds.

CHF 2'950.00

The DC 360 provides total body measurements in seconds. The easy-to-use console is designed to guide the user safely through the data entry steps. Thus, it is ideal for frequent use. The printout allows for quick analysis of key results, so users can understand their health status at a glance. Measurement results such as basal metabolic rate and metabolic age have proven to be very motivating. All measurements can be printed using the built-in thermal printer or automatically transferred to software for data collection and long-term analysis.

### **Total body measurements:**

- Body fat
- Fat mass
- Fat-free mass
- Muscle mass
- Total body water %
- Body Mass Index
