

Jordan Tufnut (JLTFNT)

There's nothing quite like throwing a hoop around and giving your body a raw, full-body workout. The problem with this is that hoops are difficult to control and unstable. A safe workout is not guaranteed. That's what the TufNut from Jordan Fitness make possible. (Price from 40kg)

CHF 750.00

TufNut gives you all the challenge of a tire with all the control you want.

There are straps on different sides and different weight versions of the TufNut so you can jump, spin, roll, lift, push, pull and walk until your heart and muscles are satisfied.

With a hexagonal, sturdy steel frame surrounded by resilient foam and covered with a strong PVC cover, TufNut can be stressed as much as you can give.

TufNut provides you with a training kit for a complete killer workout with full control, stability and safety. TufNut takes tire training to a new level, indoors or out.
