

Style fit cable pull Pure matt black with fine walnut wood

Multifunctional training with exclusive design - the premium training device for private or professional use - Made in Germany

CHF 7'950.00

Multifunctional strength training

Effective, varied and holistic - cable pulleys have always been part of the basic equipment in gyms, physiotherapy and home fitness. They enable versatile and targeted strength training. At the same time, almost all movements always address entire muscle groups, thus improving coordination and stability.

Functional trunk training

A strong body center - essential in all situations - through three-dimensional training with free and everyday movements, you activate and strengthen your trunk and supporting muscles. This ensures good body tension and an upright posture, improves your balance, prevents injuries and above all increases your general well-being.

Physiotherapy and health training

Gentle mobilization after injuries - ideal for training specifically tailored to the patient's needs. Thanks to the 2:1 ratio, the lowest selectable weight is 1.25kg per traction side.

- Optimization of available space due to the small footprint
- The swiveling traction elements are independently and continuously adjustable.
- The distance between the cable pulls is 90 cm, offering an enormous training variety
- markings on the sliding rails allow easy adjustment of the height
- anodized aluminum profiles
- wooden handle
- Thanks to the special weight block (87,5kg) the first weight steps can be adjusted in 1.25kg steps the following ones in 2,5kg steps. The minimum starting weight is thus 1.25kg per side

Timeless, effective, exclusive

Perfect for any environment - minimalist design and compact dimensions.

The ideal solution for exclusive home studios or hotels, spas and gyms that want to offer their customers an exceptional experience and an effective workout.

Unique design and perfect functionality

High training variety thanks to flexible adjustment possibilities - thanks to the specially developed mechanism, the pulling positions can be adjusted continuously and separately from each other and can be used on both sides as well as on one side. You can attach the most diverse accessories, such as cords or triceps bars, to the swiveling traction elements instead of the handles. Developed for intensive training sessions.

STIL-FIT cable pulley PURE

Matt black with noble walnut wood - the front cover is provided with a high-quality special layer. This guarantees a durable surface protection and a noble appearance. Matching the holding bar and the pull handles are made of oiled walnut wood.
