

## Sponser Nitroflow Performance 10 x 7g

Innovative NO booster for blood flow - oxygen - performance. NITROFLOW PERFORMANCE2 by SPONSERreg: is a scientifically designed dietary supplement, with high-polyphenol plant extracts (extracts from 29 plants and L-citrulline). Fruitflowreg: tomato extract keeps platelets supple, avoids excessive clumping and thus maintains normal blood flow. Suitable for endurance athletes and strength athletes.

CHF 37.00

Montmorency Sour Cherry and New Zealand Blackcurrant extracts are widely used in elite sports. Scientific data attests to an influence on performance as well as recovery ability. L-Citrulline is a non-proteinogenic amino acid and is metabolized in the body to arginine. Arginine is considered a precursor to nitric oxide (NO).

Various plant and fruit extracts provide the body with valuable polyphenols, which also activate NO synthesis. NO is a naturally occurring gas in the body, with numerous effects on the human organism. It plays a role in the control of nerve transmission, immune function, tissue remodeling, as well as the dilation of blood vessels. Vascular dilation allows more blood to be pumped into the blood vessels, which results in better oxygen utilization.

With selenium to protect cells from oxidative stress. Vitamin C contributes to the reduction of fatigue and exhaustion.

- ViNitrox (250 mg/serving): Polyphenols from apples and grapes.
- CherryPure (250 mg/serving): Innovative plant extract based on Montmorency Tart Cherry (sour cherry). Listed by Australian Institute of Sport as a type B supplement. For more information, see literature [1-7].
- FruitFlow (150 mg/serving): Tomato extract to maintain healthy blood flow.
- New Zealand Blackcurrant (150 mg/serving): Rich in anthocyanin, a secondary plant ingredient, with multiple effects on NO metabolism [8-10].
- Watts's Up (250 mg/serving): Patented citrus extract as an energy booster at the cellular level. Can be used as a triple action partner in the areas of Strength - Interval - Endurance.

Advantages

- Spectrum of action NO-Boost, Performance Optimizer
- Nutrient mix based on functional plant extracts
- for targeted nutrient optimization in high-intensity phases
- established and tested in strength, high-intensity game and endurance sports

#### Application

1 sachet content daily, dissolve in approx. 150-200 ml water. To be taken during approx. 5 days and approx. 3 h before a competition, as well as 1-2 days afterwards and/or during intensive training phases. Do not exceed the recommended daily intake. Food supplements are not a substitute for a balanced and varied diet and a healthy lifestyle. Keep out of reach of small children.

#### Ingredients

acacia fiber, L-citrulline malate, 15% plant extracts (citrus bioflavonoids, apple/grape, sour cherry, tomato, black currant, turmeric, coffee, green tea, onion, acerola, blueberry), thickeners (xanthan gum, sodium alginate), flavors, acidifier citric acid, ascorbic acid, 0.5% fruit and vegetable concentrates (broccoli sprouts, camucamu, accedil:ai, elderberry, carrot, mangosteen, cherry, blackberry, raspberry, spinach, kale, Brussels sprouts), spices (black pepper extract, garlic, basil, oregano, cinnamon), selenium-containing nutritional yeast, sweetener steviol glycosides.

Packaging unit: 10 x 7g sticks (= 10 daily rations) Flavor: black currant

Content: 70g
