

Sponser Liquid Energy Ultra 40 x 25g

LIQUID ENERGY ULTRA by SPONSER is a liquid energy concentrate made from complex carbohydrates as well as MCT fat (medium-chain triglycerides) from high-quality vegetable oils. The gel was designed to support performance during long endurance efforts of low intensity and differs from other gels largely by a higher energy density due to the fat content.

CHF 120.00

LIQUID ENERGY ULTRA by SPONSER is a tasty and energy-rich carbohydrate fat gel for ultra-endurance athletes. Based on isomaltulose, glucose, sucrose and waxy maize starch for a staggered energy supply.

To make the most of the body's energy systems, LIQUID ENERGY ULTRA contains not only different carbohydrate sources, but also vegetable fats from coconut, olive oil and macadamia. The MCT oil (middle chain triglycerides) can be absorbed directly via the portal vein and metabolized preferentially in the liver. Thus, MCT is an easily digestible and readily available alternative energy source for athletes.

MCT provides directly available energy from fat and does not have to be digested first.

It is therefore quickly available without negatively affecting the tolerability. In addition, the energy supply through MCT leads to a conservation of the body's glycogen reserves and supports the performance over a longer period. The gel was additionally enriched with salt and BCAA.

The tasty LIQUID ENERGY ULTRA gel made from coconut milk and macadamia is gluten- and lactose-free as well as free of fructose and artificial additives.

Enriched with 450 mg of BCAA as well as 140 mg of sodium per serving.

Advantages

- 140 mg sodium per serving
- 450 mg BCAA per serving
- high quality fat sources
