

## Sponser Immunoguard 10x4g

IMMUNOGUARD by SPONSER is a scientifically designed food supplement on a natural plant basis to strengthen the immune defense and protect against oxidative stress. The product was designed for athletes, but due to the high-quality functional ingredients it is also generally suitable in everyday life / work or during periods of increased stress. It can be taken preventively or acutely.

**CHF 29.50**

IMMUNOGUARD by SPONSER is a scientifically designed dietary supplement for competitive athletes, but also for people in special stress situations. Based on functional active ingredients such as nucleotides, arabinogalactan, lactoferrin, yeast beta-glucans, vitamins, zinc, as well as extracts of curcuma, reishi, black pepper and olive leaves.

Vitamins C, D, B12, folic acid and zinc support normal immune system function. Vitamins C and E and zinc contribute to the protection of cells from oxidative stress. Plant extracts contain valuable polyphenols and enzymes.

- Scientifically designed dietary supplement with broad-spectrum activity
- For normal immune system function and protection against oxidative stress
- Patented extracts
- Easy to use - 1 stick daily during periods of increased stress

### Directions:

As a dietary supplement to support normal immune system function and protect cells from oxidative stress. Take 1 sachet daily dissolved in 250 ml of water. Do not exceed recommended daily dose, keep out of reach of children. Not a substitute for a balanced diet. A varied and balanced diet and a healthy lifestyle are important for our health.

Flavor: black currant

Packaging unit: box with 10 x 4g à 250ml
