

## Body Solid safety belts for Power Rack SPR1000 (SPRSS)

The Body Solid safety straps are an option for the Power Rack SPR1000. Body Solid's Power Rack Safety Straps are specifically designed to keep users safe during heavy lifting while protecting the Olympic bars and giving the Power Rack a new look.

**CHF 279.00**

The Power Rack Safety Straps are only compatible with the SPR1000 Commercial Power Rack. They are ideal for bench presses, squats, deadlifts, rack pulls, barbell lifts and more. The safety straps are easy to adjust and protect the finish of the barbell bar.

The SPRSS Strap Safety Straps can be adjusted to the same height for traditional power rack exercises and offer the ability to be offset for specific barbell movements.

The SPRSS safety straps are made of durable 7.6cm wide reinforced nylon. The fabric has been tested to withstand 4500kg, alleviating any concerns about fully utilising the SPR1000 Power Rack at 450kg. SPRSS Power Rack Strap safety devices absorb more than traditional steel restraints, providing users with greater safety and stability.

- for use with Body-Solid's SPR1000 commercial power rack only
- 7.6cm wide reinforced nylon straps
- tested to withstand 450kg
- 3/4 pull pin for quick adjustments
- adjusts to set heights from front to back
- Protects barbell bar and power rack
- Absorbs the impact of heavy loads
