

Evo Cardio Walking Treadmill WTB500

Running at work. Bring activity to your workplace! Improve mental state and increase creativity and productivity all while promoting health and wellness. Designed for use by individuals, small groups or businesses as a whole. The EvoCardio Walkdesk WTB500 is designed specifically for those who like to exercise more while working. A traditional office can be transformed into a walking desk with the WTB500 treadmill and console. When the WTB500 treadmill is installed under a (raised) desk and the console is attached to the desk top, you can work and walk at the same time. The Walkdesk WTB500 is the gold standard for office fitness equipment. Designed for the office, not the gym, the WTB500 is whisper quiet and offers a smooth ride. Not only does this treadmill fit seamlessly into your workspace, it gives you an extra boost of energy and alertness that is often lacking in traditional work environments. Combine it with pedestal desks for the ultimate office! With the Walkdesk WTB500, you can enjoy plenty of movement while you work. Your physical and mental health improves while you send emails, make phone calls, read or delegate

CHF 1'499.00

The Evocardio Walkdesk™ WTB500 tabletop treadmill is designed to support the most demanding office environments. Quiet operation, a high-torque drive train built to last.

With the compact treadmill, you can easily transform your standing desk into a walking desk. If you're a standing desk user and want to take your office fitness game to the next level, try one of the Walkdesk™ treadmill tables. The WTB500 is one of the quietest treadmills on the market, making it an unobtrusive

addition to the office. The Evocardio Walkdesk™ WTB500 is designed exclusively for office use.

With a top speed of only 4 km/h, a perfectly tuned drive train and a 3 hp DC motor with 4000 rpm at its core, the WTB500 belongs to a premium desk treadmill. We replaced the cheaper melamine or phenolic deck materials of our competitors with a 2.5 cm thick Bakelite deck. We added guides to keep the treadmill from scraping the side rails, and by shortening the deck we gained valuable office space. A cooling fan keeps motor temperatures under control even when the treadmill is used 24/7, but makes it so quiet you can't even tell it's running. Since no one will ever run fast or even walk on a Walkdesk™ WTB500, we shortened the deck to reclaim valuable floor space that other units take away. We even lowered the deck of the treadmill to maximize the stability of the desk and minimize obstructions.

Equipment:

- 3200RPM 3hp continuous duty motor.
- Speed electronically adjustable from 0.8-4km/h in 0.1km fine increments - ideal speed 1.5-3km/h in combination with working activity
- running surface 127 x 51cm
- ascent height 12,7cm
- training computer can be mounted on the table
- LCD display showing time, distance, calories burned, speed, program with scan function
