

Sponser Premium Whey Hydro 5kg bucket

PREMIUM WHEY HYDRO by SPONSER® consists of a high-quality Whey Isolate protein matrix (Advanced Formula) for efficient muscle building, supplemented with HMB (Beta-Hydroxy-Beta-Methylbutyrate).

CHF 340.00

The basis for this high-end product consists of hydrolyzed Whey Protein Isolate, including PepForm BCAA, which consists of 50% BCAA in peptide form. Hydrolysates are laquo:predigested proteinsaquo: in which the protein chains have been enzymatically split into shorter peptides. This has a positive effect on the absorption capacity (faster absorption). The added HMB, a metabolite of the essential amino acid leucine, shortens the catabolic phase after training and thus leads faster into the build-up phase. Whey CFM Nitro consists of bioactive peptides that support NO (nitrogen) formation. PREMIUM WHEY HYDRO contains virtually no carbohydrates and fats and is lactose-free. Suitable as a high-quality training support for strength and endurance athletes.

SPONSERreg: - PREMIUM WHEY HYDRO provides a high-quality protein matrix for support of building and maintaining muscle mass based on protein hydrolysates. Hydrolysates are typically enzymatically "pre-digested" or pre-cleaved proteins and provide an absorption advantage compared to intact proteins. The sole use of Whey Protein from Cross Flow Microfiltration (CFM) guarantees a natural protein quality. Additionally completed with quality raw materials PepFormreg: BCAA and WHEY CFM NITROreg: for increased peptide-bound BCAA content per g of pure protein. WHEY CFM NITRO is a patented raw material with bioactive peptides from whey protein to activate NO (Nitric Oxide) metabolism and improved oxygen utilization. HMB (Beta-Hydroxy-Beta-Methylbutyrate) is an organic acid that occurs naturally in the human body and is synthesized from the essential amino acid L-Leucine. Power athletes, bodybuilders and intense training athletes use HMB in high-intensity phases.

PREMIUM WHEY HYDRO is lactose-free, virtually fat- and carbohydrate-free and thus offers high-quality training support for strength and endurance athletes.

Benefits:

- High quality protein matrix with maximum functionality
- Rich in BCAA 6000 mg/serving (30 g)
- Enriched with WHEY CFM NITRO for NO-Pump
- Additionally enriched with HMB
- With vitamins, magnesium and zinc

Directions:

In high-intensity phases depending on protein requirements about 30 minutes before or within 30 minutes

after training. In addition to a varied and balanced diet and a healthy lifestyle.

Ingredients:

whey protein isolate (cross flow filtration, partially hydrolyzed) 86% (Ireland),
whey protein hydrolysate* (with 50% BCAA in peptide form) 4%, beta:-hydroxy-beta:-methylbutyrate-
calcium (HMB), flavors, vitamins (ascorbic acid, nicotinic acid amide, alpha-
tocopheryl acetate, calcium pantothenate, pyridoxine hydrochloride, riboflavin,
thiamine mononitrate, folic acid, biotin, cyanocobalamin), vanilla extract and vanilla seeds
0.6%, mineral salts (magnesium carbonate, zinc lactate), thickeners (guar gum,
xanthan gum), emulsifier soy lecithin, lactase (enzyme), sweetener sucralose.

Packaging unit: 5kg bucket

Flavor: Vanilla, Chocolate

Content: 5000g
