

Micro Mobility Systems Trixx 2.0 Black (SA0104)

Here, too, the stunt scooter professionals have collaborated and enstanden is a refined stunt scooter that is perfect for learning the basics of the sport.

CHF 159.00

It offers many features, such as metal core wheels, a flex brake and a sturdy but at the same time 1305g light aluminum deck, which is cast in one piece. The handlebar itself is made of one piece and reinforced by two Y-braces. The camouflage griptape in black underlines the simple yet striking design of the MX Trixx.

New to the MX Trixx Rainbow series is the steering bearing, which has a compression system built in. It reduces the tendency to wobble, which occurs with any stunt scooter after some time. At the same time, the compression system ensures that your handlebars rotates better around itself.

New with pegs & HIC headset for future professionals - Basic tricks learn easily
