

Micro Mobility Systems Kickboard Compact Silver Matt (KB0019)

Thanks to its short aluminum footboard, the Kickboard Compact is ideally suited for beginners, in leisure time or for the way to school.

CHF 179.00

The Micro Kickboards convey, thanks to special weight steering, an ultimate surfing feeling. The Kickboard Compact has a shorter deck made of aluminum, which is more maneuverable and optimally suited for beginners.

New with interchangeable handlebars: converts very easily from T-handlebar to stick. Let's surf the Sidewalks!

Weight steering

The patented Kickboard weight steering system works by shifting your own body weight. We developed this system with Swiss specialists and it promotes balance, motor skills and coordination of the rider. In addition, this steering system creates a very special driving experience and is suitable for all ages.

Aluminum

Aluminum is a relatively soft but robust metal. Due to its nature, it is extremely corrosion resistant (rust resistant) and very light. In addition, it can be recycled an infinite number of times without any loss of quality. In fact, recycling can save up to 95% of the energy used in initial production. Therefore, it is important that all micro scooters and spare parts made of aluminum, after their service life, are always brought to the designated collection points, so that they can then be used to produce secondary aluminum. Today, the global economy could not do without it.

Joystick

In contrast to the T-handlebar, the joystick handlebar is driven with one hand. The center of gravity of the total weight is exactly in the middle of the special kickboard weight steering. This allows an optimal steering behavior. In order to get used to the weight steering, we recommend that beginners and small children first ride with the T-bar and only later switch to the joystick.

Load capacity: 100kg

Type of wheels: 120mm

Flooring: sports and leisure

Age group: teens and adults

Weight: 4.45kg

Foldable: Yes

Handlebar: T-handlebar & knob

Handlebar height 1: 72cm

Handlebar height 2: 101cm
