

Micro Mobility Systems Kickboard Monster Volcano Grey (KB0023)

Micro Kickboard Monster Volcano Grey -
the asphalt surfer with extra wide wheels
and flexible deck with fiberglass

CHF 279.00

The Micro Kickboards convey, thanks to special weight steering, an ultimate surf feeling. The Kickboard Monster guarantees a smooth and comfortable ride with its flexible footboard and extra-wide wheels. Its extraordinary design also makes it a special eye-catcher.

New with interchangeable handlebars: converts very easily from T-handlebar to stick. Lets you surf the Sidewalks!

Weight steering

The patented Kickboard weight steering system works by shifting your own body weight. We developed this system with Swiss specialists and it promotes balance, motor skills and coordination of the rider. In addition, this steering system creates a very special driving experience and is suitable for all ages.

Flexdeck

The special feature of the Flexdeck is, as the name suggests, its flexibility. This is due to the special nature of the footboard, a wood-fiberglass composite. This means that the footboard yields slightly every time it is pushed, thus absorbing vibrations caused by unevenness in the road surface while driving.

Glass fiber reinforced plastic (GRP)

GRP is a fiber-plastic composite made of plastic and glass fibers. The word fiberglass is an Anglicism, so derived from the English word fiberglass and is used colloquially for GRP. Fiberglass reinforced plastics

are very high quality and have excellent corrosion behavior. Another advantage of the material is its high elongation at break (also called elongation at tear). This means that the load must be very high before breakage can occur.

Joystick

In contrast to the T-handlebar, the joystick handlebar is driven with one hand. The center of gravity of the total weight is exactly in the middle of the special kickboard weight steering. This allows an optimal steering behavior. In order to get used to the weight steering, we recommend that beginners and small children first ride with the T-bar and only later switch to the joystick.

Load capacity: 100kg

Type of wheels: 120mm FAT

Surface: rough asphalt

Age group: teens and adults

Weight: 5,45kg

Foldable: Yes

Handlebar: T-handlebar & knob

Handlebar height 1: 72cm

Handlebar height 2: 102cm
