

Sponser Muscle Relax Shot 4 x 30ml

Uncontrolled muscle contractions (cramps) are a common phenomenon in endurance and game sports and usually lead to the termination of performance. The innovative and study-based product MUSCLE RELAX by SPONSER inhibits and reduces uncontrolled muscle contractions and can be taken acutely or preventively.

CHF 16.00

Uncontrolled muscle contractions (cramps) are a common phenomenon in endurance and game sports and usually lead to a loss of performance. Typical causes are often mechanical overload, lack of fluids, especially in cold temperatures, as well as energy and electrolyte losses. The innovative and study-based product MUSCLE RELAX by SPONSER inhibits and reduces uncontrolled muscle contractions and can be taken acutely or preventively. Available in convenient single-serving vials, the bittersweet MUSCLE RELAX is already ready-to-drink for emergencies.

- inhibits uncontrolled muscle contractions in sports
- innovative formula with vinegar, cucumber juice, quinine
- magnesium to support normal muscle function
- to be taken in case of acute beraf or as a preventive measure

Recommended dosage:

First rinse the MUSCLE RELAX in the mouth for 10 seconds, then swallow (1-2 bottles). In case of preventive intake, take with sufficient distance from activity - depending on individual tolerance.

Packaging unit: 4 x 30ml
