

## Maxi Micro Deluxe blue LED (MMD067)

The Maxi Micro originally intended as a successor to the Mini Micro, specifically for children who have outgrown the Mini Micro but are still too small and light for an aluminum kickboard. Over time, the ultra-light Maxi Micro became a trendy product for young-at-heart adults, so we redesigned it and reinforced the kickboard so it can support a body weight of up to 70 kg. New also the Maxi Micro Deluxe with sparkling LED light.

**CHF 139.00**

It weighs only 2.5 kg, so the control is particularly light and you virtually glide over the asphalt. The anti-slip coating on the footboard ensures a secure grip : the anodized handlebars emphasize the classy look of the Maxi Micro Deluxe series.

### **LED wheels**

The way to school becomes a light show - thanks to the illuminated wheels you can be seen from afar and even in the dark. The LED version not only looks cooler, but also ensures greater safety.

### **Weight steering**

The patented kickboard weight steering works by shifting your own body weight. We developed this system with Swiss specialists and it promotes balance, motor skills and coordination of the rider. In addition, this steering system creates a very special driving experience and is suitable for all ages.

- Age group: 5-12 years
