

Maxi Micro Deluxe purple LED (MMD066)

The Maxi Micro was originally designed as a successor to the Mini Micro, especially for children who have outgrown the Mini Micro but are still too small and light for an aluminium kickboard. Over time, the ultra-light Maxi Micro became a trendy product for young-at-heart adults, so we redesigned it and reinforced the footboard so that it can support a body weight of up to 70 kg. Also new is the Maxi Micro Deluxe with sparkling LED light.

CHF 139.00

It weighs only 2.5 kg, so the steering is particularly light and you virtually glide over the asphalt. The anti-slip coating on the footboard ensures a secure grip : the anodized handlebars emphasize the classy look of the Maxi Micro Deluxe series.

LED wheels

The way to school becomes a light show - thanks to the illuminated wheels, you can be seen from afar, even in the dark. The LED version not only looks cooler, but also ensures greater safety.

Weight steering

The patented Kickboard weight steering system works by shifting your own body weight. We developed this system with Swiss specialists and it promotes balance, motor skills and coordination of the rider. In addition, this steering system creates a very special driving experience and is suitable for all ages.

Age group: 5-12 years

Load capacity: 70kg

Type of wheels: 120mm LED wheels / 80mm PU

Flooring: Asphalt

Weight: 2,5 kg
