

Evo Cardio WalkDesk WTD600

Running at work. Bring activity to your workplace! Improve mental state and increase creativity and productivity all while promoting health and wellness. Designed for use by individuals, smaller groups or businesses as a whole.

CHF 1'799.00

The Walkdesk WTD600 has everything you need to start walking while you work, ideal for phone calls or working on your laptop. All you need to get started is an empty space and an electrical outlet.

Numerous scientific studies have shown that sitting behind a desk for long periods of time is not healthy. So, more exercise is the message! This device is the perfect solution to assimilate more exercise in your daily life. The walking surface of 51 x 123 cm allows you to walk comfortably. The work surface of 80 x 120 cm is large enough for your laptop, screen, documents, etc.. It is easily adjustable from 110 to 132 cm. The 3 horsepower motor is designed to run at low speed without overheating the motor. In this way, you can run as long as you want.

The LCD control display has a modern design and can be placed on the left or right side of the desktop.

Features:

- 3200RPM 3hp continuous duty motor.
- Speed electronically adjustable from 0.8-4km/h in 0.1km fine increments - Ideal speed 1.5-3km/h in combination with work activity
