

## Tunturi Fitness Trampoline (14TUSFU272)

The trampoline is the perfect training device for at home, requires little space and creates a particularly high and long-lasting training motivation through the fun factor. The fitness trampoline from Tunturi has extra legs for an inclined position, so that you can not only jump on this trampoline, but also do CrossFit exercises with balls. The fitness trampoline can be conveniently folded up and stored in a cupboard when you have finished your workout.

**CHF 149.00**

Hardly any other sport burns as many calories and boosts fat burning as trampolining: depending on the intensity, up to 1200 calories are burned per hour. Regular jumping trains up to 400 muscles in your bottom, stomach, arms and thighs at the same time and is also very easy on the joints thanks to the rubber rope suspension.

- extra legs for an inclined position for crossfit exercises with balls
- incl. removable handle
- foldable
