

Style Fit Foot Strap

The STIL-FIT footstrap made of high-quality saddle leather is ideally suited for various leg exercises on the cable pulley (e.g. adductors and abductors). Thanks to the practical Velcro fastener, it can be adjusted individually and continuously. The robust and cuddly neoprene in the inner part of the loop guarantees a comfortable fit

and a comfortable workout. The foot loop is hooked onto the cable pull by means of a carabiner and the training can begin.
