

Mini Micro Mini2Go Deluxe Plus Mint (MMD031)

Open the drawer, put in the toys, and off you go! - The Mini2go Deluxe is the innovative runabout with storage space for the kids' belongings. Once the bits and pieces or the snacks for the picnic in the countryside have been stowed away, the child simply sits on it and drives off. The new Deluxe Plus version includes a push bar - so you can take control when needed. When not in use, the bar can be easily stored in the drawer. Additionally, there is a light built into the drawer that can be removed and used as a driving light.

CHF 149.00

The Mini2go makes your offspring mobile already from 18 months and accompanies it until the age of 5 years. The steering works with weight shifting and thus promotes the motor skills and balance of children.

The handlebar is height adjustable, the drawer and the seat can be removed and the Mini2go becomes a Mini Micro.

The patented Kickboard weight steering system works by shifting the child's own body weight. We developed this system with Swiss specialists and it promotes balance, motor skills and coordination of the rider. In addition, this steering system creates a very special driving experience and is suitable for all ages.
