

Schwinn Morse Taper Triple Link Pedals

The new Schwinn Morse Taper Triple Link pedals with special plug-in system that reliably prevents the pedals from coming loose.

CHF 259.00

The SDL spindle design is 30-50% larger than the standard, non-threaded design.

The beveled surface is inserted into the crank arm, greatly increasing the strength of the pedal connection point by providing 360 degree contact and 100 cm² surface. The spindle end is 50% larger than standard pedals, greatly increasing strength and reducing the risk of breakage.

Schwinn Morse Taper Triple Link pedals are dual link pedals and compatible with Look, Delta and SPD systems. Thanks to the toe clips, they can be used with both cycling and sports shoes. In this way, they offer the user the greatest possible flexibility and provide an authentic riding feeling.

In addition, a basket with straps can be attached to the receptacle of the Look system if required. Due to the great flexibility of the Schwinn Triple Link pedals, they are ideal for use in the course area or club sports.

- Version 1: Schwinn Pedal Morse Taper Triple Link Delta (SPD-Clip / LOOK DELTA / basket with strap)
- Version 2: Schwinn Pedal Morse Taper Triple Link KEO (SPD-Clip / LOOK KEO / basket with strap)
