

Micro Mobility Systems Rocket Black (SA0048)

Just like the Micro Scooter Monster Bullet, the Micro Scooter Rocket is also equipped with extra-wide wheels. These are particularly suitable for frequent and steep downhill rides and rough surfaces.

CHF 169.00

Due to the wide contact surface, the wear of the roller during constant braking is minimized as much as possible. The rubber insert on the brake plate also prevents it from heating up quickly. The footboard is made of aluminum and thus ensures optimum stability even at faster speeds. In addition, this scooter looks cool and is ideal for the way to school or the city stroll.

Load capacity: 100kg

Type of wheels: 120mm FAT

Surface: City and steep descents

Weight: 4.25 kg

Foldable: Yes

Handlebar height 1: 65cm

Handlebar height 2: 93cm
