

Tunturi weight vest 15kg (14TUSCL352)

Comfortable 15 kg weight vest with variable weights. Ideal as an additional load for even more demanding training.

CHF 119.00

Want to increase your strength training with your own body weight, such as pull-ups, push-ups or dips? With the Tunturi Fitness weight vest, you can do this while still retaining unrestricted freedom of movement.

The great advantage of this weight vest is not only that you still have your hands free during training and can still increase the weight during fitness exercises, but that you can also do this gradually. With the Tunturi strength training weight vest, you have a durable vest in which the weight can be gradually increased or reduced using individual weight bags.

This weight vest is also very suitable for cross-fit exercises outdoors, as the nylon material of this vest is very solid and UV-resistant at the same time.

- 15kg weight vest
- variable weight loading through weight pads for an even weight load - the 15 kg Tunturi weight vest contains 12 weight bags of 1.25 kg each
- for training strength endurance and speed strength in all sports
- good adjustment thanks to Velcro fasteners
- made of nylon material
- breathable
- with shoulder pads
- with reflective strips
- Hand washable
