

Tunturi Platinum Pro AirBike (17PTAB2000)

Platinum PRO is the highest quality line from Tunturi. This equipment is perfect for the ambitious home user, for physiotherapies and schools up to smaller gyms.

CHF 1'990.00

The Platinum PRO Air Bike non Tunturi is a unique bike in the cardio endurance range. You can train not only your condition but also the upper body with this bike. By pulling and pushing the handlebars up and down, the arms, chest and shoulders are also trained. To increase the difficulty, the feet can be placed on footrests at the front of the bike and only the handles can be used for training. The fan is activated when the workout is started - i.e. biking - and this is how the air resistance is then generated.

Equipment:

- Air resistance system - the resistance is continuously regulated by the air resistance system by the number of revolutions - the faster you pedal, the higher the resistance
- possibility to pedal forward and backward to vary the workout
- high quality chain drive system for optimal power transmission
- training computer with monochrome LCD display with illumination and display for time, distance, speed, calories, pulse and watts
- dual action design - the movement of arms and legs is synchronized for a natural flow of motion
- foot grid for isolated upper body workout
- mains-independent power supply
- 13 training programs (1 user program and 12 preset training programs)
- heart rate: telemetric
- low entry
- ergonomic comfort gel seat
- quick seat height adjustment
- vertical and horizontal saddle adjustment
- guide price chf 2'399.--
