

Assault Fitness AirBike ProBike X

The Assault AirBike is a full-body training device suitable for beginners to advanced users. The combination of cross trainer (with upper body bars) and bicycle ergometer is perfect for an effective and joint-friendly full-body workout at the highest level. Pedaling, pushing, pulling - the AirBike not only trains aerobic and anaerobic endurance, but also strengthens the muscles. Thanks to the air resistance system, the user can not only regulate their resistance independently and continuously by adjusting the number of revolutions, but can also decide for themselves whether they want to put more strain on their lower or upper body.

MEET THE NEW AIRBIKE ProBike X - developed from scratch!

The Pro Bike X combines the advantages of the Elite Bike with the classic design of the Classic Bike. The result is a highly durable bike with low maintenance requirements - built for extreme training.

Maximum durability makes the AirBike ProBike X an ideal training device - specially developed for the stresses and strains of CrossFit boxes. The new AirBike Pro is designed for the most comfortable "ride" you can experience.

Sealed ball bearings, a closed system around the chains and an "industrial powder coating" guarantee very low maintenance.

THE AIRBIKE PROBIKE X CONSOLE.

Console with Bluetooth - the ProBike X gets its display from the Elite Bike. This is equipped with Bluetooth, which enables the bike to be connected to the Assault Fitness app that will be released in 2021. The entire training process can be tracked there and comparison options are offered.

Features:

- Air resistance system - the resistance is continuously regulated by the air resistance system through the number of revolutions - the faster you pedal, the higher the resistance - the Elite model offers a higher resistance compared to the Classic when the speed is increased.
- 69cm steel wind wheel
- Option to pedal forwards and backwards to vary the workout
- High-quality drive system with V-belt for optimum power transmission
- Training computer with LCD window and display for time, distance, speed, watts (watt display calibrated for 5-150 RPM), RPM, calories, heart rate
- Bluetooth and ANT+ compatible
- Dual-action design - the movement of the arms and legs is synchronized for a natural movement sequence
- Foot grid for isolated upper body training
- mains-independent power supply (battery)
- 8 training programs
- Heart rate: telemetric
- low entry
- front transport wheels
- Ergonomic comfort seat
- quick seat height adjustment
- vertical saddle adjustment
- Target price CHF 1'249.--

Application: home use to continuous commercial use, payload: approx. 155kg

Device dimensions: L126.6 x W61.3 x H129.9cm, weight 53.8kg

Accessories: integrated receiver for chest strap transmitter

Options: Bluetooth transmitter belt, removable windscreen

Warranty: 2 years on labor and parts for home use, 1 year on labor and parts for commercial use
