

Sponser Protein Drink 8 x 330ml PET

PROTEIN DRINK is a food supplement based on whey protein (strawberry-cranberry) or milk protein (vanilla). A protein-rich diet supports the development and maintenance of muscle mass.

CHF 28.00

Functional & tasty! The new functional PROTEIN DRINK combines the two traditional brands SPONSER and EMMI and stands for maximum functionality, taste and Swiss quality.

PROTEIN DRINK is a nutritional supplement based on whey protein (Strawberry & Pina Colada) or milk protein (Vanilla). A protein-rich diet supports the development and maintenance of muscle mass. Regular protein intake throughout the day is recommended, as the body is constantly building up and breaking down protein.

High-quality whey or milk protein contains all the essential amino acids and helps to prevent the breakdown of muscle mass. This can be caused by inadequate nutrition, lack of physical activity and age-related loss of muscle mass (sarcopenia). PROTEIN DRINK also supports training in terms of recovery capacity and the build-up of powerful muscle mass.

The tasty PROTEIN DRINK is an excellent practical and high-quality nutritional supplement that can be incorporated into everyday life: as an on-the-go breakfast, a tasty snack and, of course, as a recovery drink after a training session.

PROTEIN DRINK is made from high-quality Swiss milk ingredients and is produced in Switzerland. No added sugar and lactose-free, so also suitable for lactose intolerance. Can be kept without refrigeration (UHT), but tastes best chilled.

*Naturally contains sugar

- 27g high-quality whey protein (strawberry-cranberry) or milk protein (vanilla)
- Without added sugar*, lactose-free

- Made in Switzerland from Swiss milk
- High-quality, targeted basic product to take shortly before or after exercise
- Cost-effective alternative to open dispensing
- Recyclable packaging material

Application:

1 drink approx. 1 hour before and within 1 hour after exercise or as a protein-rich snack. Protein supports the build-up and maintenance of muscle mass.
