

## Tunturi Swivel Swivel Speedball Ceiling Mount (14TUSBO056 )

The ball bearing swivel joint from Tunturi for mounting speedballs on the ceiling is fixed with 4 screws to hang speedballs optimally.

**CHF 34.90**

Due to the built-in ball bearing, this swivel rotates freely around the vertical axis. This Speedball swivel is constructed enormously stable and is made of solid, chrome-plated steel. The diameter is 75mm.

There are 4 screws (without dowels) included for mounting. We recommend, however, when mounting to check whether the ceiling to be used requires other screws or dowels.
