

Sponser Liquid Energy 20 x 70g

Liquid energy concentrate from Sponser made from fast and slow metabolizable carbohydrates, sodium and potassium.

CHF 57.60

Power from the tube (18 tubes per display) - Highly concentrated energy in liquid form. (15kcal per tube)

- Sponser Liquid Energy is highly concentrated energy in liquid form with a neutral taste.
- The 70 g tube contains 215 kcal of pure energy and is extremely well tolerated.
- The balanced sugar spectrum (37% short-chain, 63% long-chain sugars and fructose) ensures a staggered energy release.
- The added sodium accelerates the absorption of the sugars into the organism, while the potassium is needed for carbohydrate metabolism.
- Liquid Energy is therefore ideal for endurance athletes who rely on a constant supply of energy.
- Practical tube: can be manipulated with one hand, resealable, easy to dose, no smearing and sticking!

Ingredients

- Glucose syrup, fructose, dextrose, water, sodium chloride, potassium citrate, ascorbic acid.

Packaging unit: 20 x 70g tube

Flavor: neutral

Content: 1400g
