

Sponser Maltodextrin 100

Maltodextrin is a tasteless carbohydrate powder for enriching drinks with energy

CHF 15.75

95 % carbohydrate concentrate (dry matter 99.9 %) - Provides an energy boost with a long-term effect. The tasteless powder is made from maize starch. 100% carbohydrate.

- Carbo Energy provides the athlete with additional energy before, during or after exercise. Short, medium and long-chain carbohydrates cover immediate and longer-term energy requirements through staggered release. Very well tolerated.
- Before training/competition to recharge energy stores, in between to maintain performance.
- Carbo Energy is tasteless and immediately soluble. It can be stirred into any drink, tea, isotonic, fruit juice, water: or added to muesli, yoghurt and other foods.

Ingredients

- Maltodextrin - produced by enzymatic degradation of maize starch - consisting of mono-, di-, oligo- and polysaccharides.
