

Hoist Fitness Kneeling Leg Curl (CF-3411)

Combining European styling and American engineering, HOIST FITNESS takes commercial free weight equipment to a whole new level. The new CF Premium Line has the same aesthetic features and durable construction as the popular HOIST ROC-IT line.

CHF 2'490.00

The kneeling position focuses resistance on target muscles throughout the movement for a more effective exercise. Padded knee support quickly and easily swivels from side to side and automatically holds its position, making exercising both legs a breeze without unnecessary adjustments in between. Contoured pads provide users with maximum comfort and support. Stabilizing, ergonomic handles help users achieve and maintain optimal positioning for superior results. Weight horns covered with high-impact polypropylene protect the frame and reduce noise while keeping your facility more organized.

Features:

- kneeling configuration allows easy positioning of the pivot point and concentrates resistance in the target muscles throughout the movement for a more effective exercise
- pivoting padded knee support allows the user to switch from left leg to right leg without further adjustments
- stabilizing ergonomic thermoplastic polyurethane grips improve elasticity and provide protection from oil, grease and abrasion complete with non-slip aluminum end caps
- contoured padding for a comfortable, figure-hugging fit
- sturdy frame construction in commercial quality: 2.5 mm wall thickness tubes (~ 12 gauge)
- polyurethane-covered barbell racks to protect the frame and reduce noise

Use: home to commercial continuous use, maximum storage weight 112.5kg per rack, maximum payload training weight 112.5kg per rack, starting weight 5kg per horn

Equipment dimensions: L118.5 x W34.4 x H133, weight: 110.7kg

Option: Weight plates
