

## Airex Balance Pad Cloud, red - L46 x W41x D6cm

The AIREX® Balance-pad Cloud produces more intense stimulation because it is far more unstable and wobbly than any other predecessor in the AIREX® Balance-pad product line. These characteristics are due to the lower density foam composition of the Cloud. The Cloud is an advanced balance-pad version used by athletes who are able to maintain perfect balance. The waffle-like texture imprinted on both sides facilitates comfortable and non-slip therapy and training applications.

CHF 71.90

### **Airex Balance Pad "Cloud": Especially soft and destabilizing!**

The ruby red Airex Balance-Pad "Cloud" is made of a closed-cell foam. Due to its increased density and yet soft texture, the body must constantly adjust to new loads and is thus challenged in the best possible way - ideal for intensive balance training of advanced and trained in physiotherapy and prevention training. Its waffle-like surface structure provides additional stimulation of the foot receptors and optimum slip resistance. The hygienic material is dirt and water repellent and easy to clean.

### **Possible applications:**

- Balance training
- Reaction/Coordination
- Stance stability
- Prevention
- Rehabilitation/Therapy

Dimensions: L48 x W41 x H6cm

Color: red

Indicative price CHF 79.90

### **Medical Purpose:**

AIREX® products are designed as a movement therapy aid for both institutional and home use. Item placed on the floor is used as a support for a person during medically indicated and prescribed exercises to improve motor skills and balance or postural control and/or for movement therapy treatment of muscle weakness in the limbs and trunk as a result of a neurological or orthopedic condition.
