

Weider Premium BCAA Powder 500g can

Weider Premium BCAA Powder offers your body a precise balance between BCAA amino acids and glutamine. Both amino acids have a high proportion in muscle tissue. The incidence of BCAA amino acids in muscle tissue is about 35% and the incidence of glutamine even about 60%! BCAA amino acids are essential amino acids that the human body cannot produce. Therefore, the body depends on the external supply of these amino acids (e.g., through a protein-rich diet)

CHF 35.00

Food supplement. Premium BCAA Instant contains L-leucine, L-isoleucine and L-valine in a ratio of 2:1:1 and is enriched with the semi-essential amino acid L-glutamine and high-quality valuable vitamin B6.

The easily soluble powder is perfect for consumption before, during or after training. L-Leucine, L-Isoleucine and L-Valine in a ratio of 2:1:1

- with valuable vitamin B6
- plus L-Glutamine
- easily soluble
