

Weider Omega 3 Superior 90 capsules

Important fatty acids for health and well-being with incredible 500 mg DHA per capsule

CHF 28.90

Many people rarely eat fish or simply do not like it. However, fatty sea fish in particular contains high amounts of long-chain, polyunsaturated omega-3 fatty acids. Omega-3 fatty acids are important nutrients that the body cannot produce itself in sufficient quantities. However, regular intake is necessary to ensure optimal body functions and processes.

Our Omega-3 Superior fish oil capsules contain a total of 1000 mg of high-quality fish oil per capsule, including 500 mg of DHA and 100 mg of EPA. For optimal bioavailability, we use the triglyceride form (TG) and protect the valuable oil from unwanted oxidation with natural vitamin E.

- DHA as well as eicosapentaenoic acid (EPA) also make an important contribution to maintaining heart health.
- Omega-3 fatty acids in high-quality triglyceride form

Packaging unit: box of 90 capsules
Flavor: neutral

Content: 121g
