The wall bars BenchK 723B set includes the BenchK wall bars 700B including the BenchK pull-up bar PB2B, the BenchK dip station DB1B and the BenchK training bench B1B.

The BenchK 700B wall bars is a sturdy construction. The rungs are made of beech wood and the side rails are made of metal. The wall bars is an attractive piece of sports furniture for the whole family and fits seamlessly into the living room. It can be used by any user, regardless of age and physical fitness, up to a weight of 150kg. The BenchK 310B/710B wall bars will help improve physical development. Regular exercises on the wall bars contribute to the development of various muscle groups, spine and joint mobility.

The PB2B metal pull-up bar is permanently mounted on the wall bars and is not removable. The pull-up option allows you to perform exercises on different muscle groups. The pull-up bar is equipped with six non-slip handles with polyurethane coating for easy exercises. additional supports are made of 4mm thick metal. The main construction consists of a rectangular profile 50 x 40mm and a tube fi 27.2mm

(wall thickness 2mm). All metal parts are powder coated. The precision of workmanship and ideal shapes are achieved by using modern welding and laser cutting technologies.

The BenchK Dip Bar DB1B with back pad can be directly and easily hooked to the rungs of any BenchK wall bars thanks to the four hooks padded by felt. The height of the dip bar can be individually hooked for the convenience of each user. The arm rests and back pad are made entirely of high quality polyurethane (PU) foam, which ensures a durable, resilient and easy-to-clean finish and allows for comfortable exercise performance. BenchK's Dip Bar has a sturdy construction with a profile of 50x40mm and a thickness of 2mm. The four handles are non-slip and highly comfortable to hold.

BenchK's B1B reversible training bench is equipped with an additional seat and four additional support rollers for the legs. The BenchK training bench can be directly and easily hooked to the rungs of any BenchK wall bars from flat to inclined. It can be used as an abdominal bench as well as a weight bench. The incline of BenchK's workout bench can be individually hooked in height for the convenience of each user. The padding of the training bench is completely made of high-quality polyurethane (PU) foam, which ensures durable, elastic and easy to clean equipment and allows you to perform exercises comfortably. BenchK's training bench has a sturdy construction with a profile of 50x40mm and a thickness of 2mm. The training bench from BenchK is used for abdominal training. The upholstered rollers provide a secure grip during the exercise performance. The insertable seat allows the bench to be used as a weight bench suspended from the wall bars. The retractable legs allow for space-saving storage.
